2019

### Management Trainee - IT

Naveena Group of Industries | October 2019 – December 2019

- Worked on Oracle E-Business Suite.
- Developed and deployed apps on Oracle Apex using PL/SQL.

## PROJECTS

### Foree BackOffice Portal:

A Back-office Portal that manages the records and its maintenance. It is developed on Angular JS. I am working on its new features and its maintenance.

### Foree App:

A payment application which allows users to link their payment methods and send/request money and messaging. I am working on its Backend API development.

### Foree Business Portal:

A business portal that manages records all the bill payments and settlement for around more than 200 merchants onboarded on Foree. It is developed on Angular. I am working on its maintenance.

### Data Security Device (FYP):

A dongle security device which uses RSA encryption algorithm to encrypt/decrypt data by integrating with a customized application on C#. I worked on its application as well as the integration with hardware.

### Aptitude Test Checking App:

An MCQ's checking application used for NED University's aptitude test, this application uses the concepts of image processing and calculates candidate's score based on the option selected on answer sheet.
